YOUR PERSONAL “FLYING CARPET” Step into it, press a button, and off you go to market, to a friend’s home, or to your job. Take off and land anywhere; no parking problems. Plug in to any electric outlet for recharging. They’re working on it!

MORE POWER TO YOU!
America’s independent light and power companies build for your new electric living

Tomorrow’s higher standard of living will put electricity to work for you in ways still unheard of!
The time isn’t too far off, the experts say, when you’ll wash your dishes without soap or water—ultrasonic waves will do the job. Your beds will be made at the touch of a button. The kids’ homework will be made interesting and even exciting when they are able to dial a library book, a lecture or a classroom demonstration right into your home—with sound. (Some of this is happening already.)
To enjoy all this, you’ll want a lot more electric power, and the independent electric companies of America are already building new plants and facilities to provide it. Right now these companies are building at the rate of $5,000,000,000 a year, and planning to double the nation’s supply of electricity in less than 10 years.
America has always had the best electric power service in the world. The electric companies are resolved to keep it that way.
